David Clark
Project Manager
US Army Corps of Engineers
david.s.clark@usace.army.mil

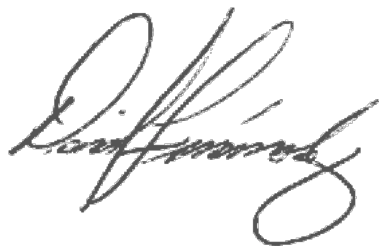

Dear Mr. Clark:

As chairman of the City of Nogales Planning and Zoning Commission it is my duty in representing the interests of the people of Nogales to stay informed about issues such as this contamination so called "cleanup."

It is of the utmost importance that I remind you and stress the public concern with this unsatisfactory attempt at a solution. The one half acre cleanup does not address the up to 16 acre or more contamination problem. I must stress that the Corps of Engineers is placing the population of Nogales and Rio Rico (downstream) in danger by failing to fully address this problem.

The community is demanding that you address this problem. Please do not be negligent. Keep us informed as to how this larger issue will be resolved. Direct this to your higher-ups and copy us in the community of Nogales when you do so. Thank you for your helpful and informative meeting of March 6, 2018.

Sincerely,

A handwritten signature in black ink, appearing to read "David Fernández", written in a cursive style.

David Fernández
Chairman, Planning and Zoning Commission
City of Nogales
