Subject: Nogales target range clean up.

Hello David, clean up of contamination resulting from the use of the target range by Border Patrol and CBP has to be 100% of the area contaminated!

Loosing our health or life is not an option! Breathing, drinking or eating poison is unthinkable because of a contamination caused by Federal agents!

We ask that you reconsider the scope of the clean up and 100% of the area contaminated gets cleaned.

Sincerely,

Nohe Garcia
